While the 150 kWh battery pack is a technological tour-de-force, Nio has a lot of room for improvement. A recent real-world test of a much bigger Lucid Air with a smaller 112 kWh battery pack delivered 523 miles and much better energy efficiency. Imagine if Lucid was using the 150 kWh battery - it would set a new world record.

First, the battery chemistry in Model S is optimized for high capacity vs. safety. Powerwall batteries have lower specific capacity (energy density) but they are much safer chemistry from catching fire. With Model S cells you better have your battery voltage monitoring and charging cutout system setup properly. Even then I would not trust it.
