Is hydrogen a solution to the Gambia's energy deficit?

One month later, the government signed another MoU with H2 Gambia Limited, a subsidiary of the UK-based HydroGenesis Group, at African Energy Week 2023 in Cape Town to further explore the commercial prospects for hydrogen production. Renewable energy and green hydrogen present a dual solution to The Gambia's energy deficit.

Why did Gambia not import energy?

In countries that export large amounts of energy, falling energy prices can also cause major economic shocks. Gambia did not import energy. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used.

What are the different types of energy transformation in Gambia?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Gambia for 2021. Another important form of transformation is the generation of electricity.

How many people in Gambia do not have electricity?

In Gambia, 55% of the overall population does not have access to electricity and only 10% have access to clean cooking facilities.

Is the Gambia ready for a green energy revolution?

The Gambia's green energy revolution, its commercial potential for green hydrogen production and more will be explored at the upcoming MSGBC Oil, Gas & Power 2023 conference and exhibition.

Why is the Gambia focusing on green hydrogen production?

In recent months, The Gambia has also directed its focus to green hydrogen production, driven by ample solar and wind resources, as well as its coastal location that enables easy access to water for electrolysis.
