

Small Modular Reactors (SMRs) are emerging as a potential game-changer for the data centre industry, offering a promise of stable, low-carbon, and highly reliable power. As the demand for ...

Delta Electronics (OTC:DLELY) has announced plans to construct a new regional headquarters building in Hoofddorp, Netherlands, marking a significant expansion in the EMEA region. The ...

To accelerate the green energy transition and promote efficient energy resources in the world, a range of policy options and joint efforts among the countries will be required, ...

Specifically, the carbon intensity of electricity fell to just 124gCO₂/kWh in 2024. This is 70% lower than it was in 2014 when each unit of electricity was associated with 419gCO₂/kWh. Carbon intensity of UK ...

Adsorption carbon capture has emerged as a focal point in addressing current global climate issues. Temperature-vacuum swing adsorption (TVSA) has gained increasing attention due to ...

Data Center Standards: Require AI developers to meet efficiency benchmarks, use low-carbon energy sources, or contribute to local grid resilience. Model Reporting: Mandate transparency ...

The low-carbon economy optimization scheduling objective function is formulated, including two components: maximizing the energy self-sufficiency rate of integrated electricity-hydrogen ...

The LIAM F1 UWT generates between 300 and 2,500 kWh per year and offers additional free electric power other than solar power for a household. However, the integration of the two systems can make the homeowner nearly energy ...

China's carbon neutrality goal by 2060 presents major challenges and opportunities for its electricity market. This study analyzes baseline, low-efficiency, and high-efficiency ...

Continuously increase R& D investment in low-carbon product design, renewable material application, and circular economy technology development Climate-related Risks and ...

China will work toward an economic system that prioritizes green, low-carbon and circular growth, and will promote the across-the-board green transformation of its social and economic development in a bid to deliver on its ...

The Virginia Clean Economy Act (VCEA), with its demand to eliminate hydrocarbon fuels for electricity in Virginia, will soon take a deeper bite out of bank accounts for many Virginia families and businesses. As of ...

300 kWh low-carbon economy
