What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

For a specific load, like running a 3.2 kW load for 14 hours, calculating the total energy requirement helps in determining the number of batteries needed. In this case, you would need a substantial battery bank, possibly involving multiple 200Ah batteries, to sustain this load for the specified duration. The lifespan of a 200Ah battery is another critical factor.
