

AC-DC rectifiers

Bridge rectifiers as power semiconductor modules from SIRECTIFIER 24-07-2025 Key Information at a Glance SIRECTIFIER offers a wide range of power rectifier bridges: B2U, B6U, B2H, B6C, and others. Ideal solutions for drive systems, ...

Examples of these include thyratrons, mercury-arc rectifiers, magnetic amplifiers, and rheostat controllers [1]. A significant shift occurred with the introduction of self-commutating devices ...

What is a Bridge Rectifier? A Bridge Rectifier is a device used to convert AC into DC. Its main purpose is rectification ensuring that electric current flows in one direction. It is composed of diodes arranged in a bridge structure. ...
