What is aistore & how does it work?

AISStore (AIS for short) is a built-from-scratch, lightweight storage stack tailored for AI apps. It's an elastic cluster that can grow and shrink at runtime and can be ad-hoc deployed, with or without Kubernetes, anywhere from a single Linux machine to a bare-metal cluster of any size.

How do I install aistore (cluster)?

Generally, AISStore (cluster) requires at least some sort of deployment procedure. There are standalone binaries, though, that can be built from source or installed directly from GitHub: The script installs aisloader and CLI from the most recent, or the previous, GitHub release.

Why should you use IBM storage for data & AI in OpenShift?

Experience the easiest way to deploy OpenShift applications and harness watson.x's AI capabilities, while seamlessly integrating virtualization and containerization. IBM storage for data and AI unlocks the latent value in your data to fast track innovation and business results.

ASI Storage Solutions offers an extensive line of lockers, benches, cubbies, and shelving that comes standard with leading-edge features. We ship out more products in 48 hours than anyone else in the industry. ASI Storage meets or exceeds any specification, and our products are LEED®; Friendly, Designer Friendly, ADA Friendly, and User Friendly ...

ASI Storage Revit families have been created to a consistent, high standard with the objective of finding a balance between complexity of use, functionality, documentation output, file size and performance in a Revit project environment

Cubbies are the ideal solution when non-locked, open storage is appropriate, such as in preschools, day care centers, churches, office supply/mail rooms, laundry rooms, and retail outlets. Kids love them because they are the right size for little hands and the right height to hang their backpacks and coats on their own.

Metal lockers The visually appealing and very durable Traditional Collection is our most widely distributed locker line. Offering the most value for typical locker applications, this collection is available in a full range of spacious sizes, from single- to six-tier configurations, as well as 16-person and wall-mounted.

ASI Group Canada / Product Selector / Storage Solutions. Storage Solutions Metal Lockers Metal Lockers are ideal for typical to rugged applications. Available in 14 to 16 gauge doors and a variety of sizes and color. Choose from Traditional, Traditional Plus, Competitor, Pro, All-Welded, Specialty or Angle Frame Collections.

Doors and exposed body parts on Traditional and Traditional Plus Metal Lockers shall be selected from ASI

With the same standard features as the Traditional line, the Traditional Plus Collection are even more ruggedly built. Built using a Unibody (TM) system, the sides and back of the locker are formed from a single piece of HDPE, while the locker door frame is made from one piece of machined HDPE. These features add structural integrity and rigidity.
