

# Akku grain Brazil

What is akkugrain?

AkkuGrain is the first protective agent specially developed for the transportation and storage of lithium-ion batteries. Made from purely organic components, AkkuGrain only reacts in the event of a thermal runaway. Curious? Ask your questions here! When heat is released, the components of the AkkuGrain bind toxic and flammable gases.

Is akkugrain a combustible material?

AkkuGrain is officially certified and patented as a non-combustible material. AkkuGrain ensures a temperature reduction in the event of a thermal runaway due to its composition. Due to its low specific density, AkkuGrain is light, approx. half the weight of sand

Can akkugrain be reused?

AkkuGrain can be reused as often as desired after transport without thermal runaway. AkkuGrain is available in different bag sizes and as bulk material. As a manufacturer, we offer you complete solutions for the transportation of lithium-ion batteries.

What can akkugrain do for You?

AkkuGrain is available in different bag sizes and as bulk material. As a manufacturer, we offer you complete solutions for the transportation of lithium-ion batteries. At your request, we can also develop individual solutions for lithium-ion batteries, regardless of whether they are new, defective or critically damaged.

2018; KANSAS CITY, MISSOURI, US -- Most of the commodity trade fear of La Niña negatively influencing South America has passed. Weather conditions since the end of October have been mostly very good in Brazil and Argentina and the market mentality has been more bearish than bullish over futures prices; however, changing weather this month is likely to ...
