

# Angola energy solutions provider

What are oil and gas companies in Angola?

The oil and gas companies in Angola are involved in all stages of the petroleum industry worldwide, but of course mostly in the West of Africa. They search for and produce petroleum, they transport, refine and market petroleum and petroleum products. They are therefore called integrated companies.

What is energy in Angola?

Energy in Angola describes energy and electricity production, consumption and export from Angola. The energy policy of Angola reflects energy policy and the politics of Angola. Biomass accounts for 58% of the country's energy consumption; oil accounts for 35%, gas 4% and hydroelectric power 3%.

Who produces electricity in Angola?

Electricity is produced by Empresa Nacional de Electricidade de Angola. Angola ranks second in crude oil production in sub-Saharan Africa, after Nigeria. In 2022, the country produced an average of 1.165 million barrels of oil per day, according to its National Oil, Gas and Biofuel's Agency (ANPG).

What are Angola's energy priorities?

Increasing electric power availability to diversify the economy and meet the increasing energy demand of a growing population is among the Angolan government's highest stated priorities.
