Should Angola invest in energy storage solutions?

With the ongoing solar projects under development in Angola with an installed capacity amounting to 500 MW, it is urgent to start thinking about efficient energy storage solutions. What structural challenges must be addressed for Angola to seize its renewable energy potential?

Can Angola deploy pumped-storage hydroelectricity & hydrogen solutions?

Fernando Prioste, CEO of COBA Group, talks to The Energy Year about Angola's potential for deploying pumped-storage hydroelectricity and hydrogen solutions as it develops a robust energy industry and the central role of COBA Group in the country's power arena.

Why did IEA visit Angola?

The request spurred several visits to Angola by IEA teams who met with energy sector officials and other stakeholders collecting documentation in the capital, Luanda and in Lubango. Angola: Towards an Energy Strategy is the result of the team's work: an independent review of the major energy policy issues facing the country.

Can Angola achieve energy self-sufficiency?

Angola has everything it needs to achieve energy self-sufficiency through renewable sources - not only water, but also sun and wind. With these three natural resources, Angola could achieve the transition from oil and gas to renewable energies, and then boost its energy self-sufficiency.

Can a gas grid be used in Angola?

This is not possible in Angola as there is no gas grid, but the hydrogen obtained from renewable energies can be shipped overseas or converted into ammonium. In turn, this chemical compound can be used as an energy storage component that could be exported or used for the fertiliser industry.

How can modern energy sources improve livelihoods in Angola?

Increasing access to modern energy sources in a sustainable manner would help improve livelihoods directly, as well as indirectly through the promotion of economic development. At the request of the Angolan government in 2005, the IEA conducted a survey of the Angolan energy sector and energy policies.
