

# Ansell energy American Samoa

Who is Ansell energy?

Ansell Energy is at the forefront of the renewable energy revolution, seamlessly blending innovative solar origins with the dynamic world of battery technology. Founded in 2005 by the visionary Mr. L Ansell, our mission has always been to harness cutting-edge technology to provide sustainable, efficient power solutions.

Is American Samoa a renewable country?

American Samoa's energy sector relies almost entirely on imported fossil fuels, although renewables represent a small but growing power system contribution. The territory possesses substantial solar energy resources, as well as wind and biomass resource potential.

How much solar power does American Samoa have?

Of the 5 MW of ASPA's grid-connected solar PV capacity, 4.1 MW is utility scale and 900 kW is distributed across rooftops. American Samoa's smaller islands are moving toward a combination of solar, batteries, and diesel generators.

Does American Samoa have a geothermal energy plan?

The 2016 American Samoa Energy Action Plan identifies some geothermal resources, but none of these are viable for commercial electricity generation. The 2016 plan instead emphasizes the development of wind and solar power (Ness, Haase, and Conrad 2016). American Samoa is exploring opportunities for both offshore and onshore wind power generation.

Does American Samoa have energy issues?

Although energy burdens pose a real challenge in American Samoa, the territory is working to advance energy justice. For example, the Territorial Energy Office provides home energy efficiency programs to help reduce energy costs for low-income households.

When did American Samoa adopt its emergency energy conservation plan?

American Samoa adopted its Emergency Energy Conservation Plan in 1982 (see Chapter 5, Annex A of ASCA 12 for plan details). 1981: Title 12 ASCA establishes ASPA, creating an institutional structure for the generation, transmission, distribution, and sale of electric power within American Samoa.

Introduction. American Samoa, currently an unincorporated United States territory in the South Pacific, is comprised of 5 main islands and 2 coral atolls, with Tutuila being the largest (142.3 km<sup>2</sup>), most populous (> 60,000) island (Fig. 1). Located near a semidiurnal tidal amphidrome, Tutuila experiences a small tidal range with 0.394 m mean high water (MHW) ...

\*EP100: Led by the Climate Group, it aims to accelerate energy efficiency through energy smart businesses. Ansell will implement Energy Management Systems (ISO50001) at all plants over the next 5 years, which
