Central control in association with compressors usually signifies relatively intelligent control systems. The basic demand is to be able to maintain a predetermined pressure within tight limits and to provide economic operation ...

El control central de compresores generalmente implica sistemas de control relativamente inteligentes. La demanda básica es ser capaz de mantener una presión predeterminada dentro de límites estrictos y proporcionar un funcionamiento económico para la instalación. ... Atlas Copco Compresores. Avda. José Gárate, 3 - P.I. Coslada 28823 ...

En una instalación correctamente dimensionada, la fluctuación de presión se mantendrá dentro de ± 0,2 bar. Es extremadamente importante para la eficacia operativa que el sistema de control central seleccione el compresor, o la combinación de compresores si hay varios de diferentes capacidades, que sea más económico.

El controlador Equalizer 4.0 o EQ 4.0 monitoriza y gestiona hasta seis compresores y secadores, garantizando que el sistema al completo y cada uno de sus equipos de aire funcionen de forma óptima. Más información aquí;
