

Back up power for home Malawi

How many people have access to electricity in Malawi?

This is about 3.5% of the population provided with access in the past 12 months, bringing the total access rate in Malawi to around 23%, up from 19%. The target is to give access to 180,000 on-grid households and 200,000 Off-Grid households by the end of June 2025, translating to an additional 1.9 million people having access to electricity.

How many households are connected in Malawi?

So far, more than 140,000 households have been connected. This is about 3.5% of the population provided with access in the past 12 months, bringing the total access rate in Malawi to around 23%, up from 19%.

Why is off-grid access important in Malawi?

For Malawi, Off-Grid access plays a very critical role in rapidly scaling up electricity access in many households that are far from the national grid and where affordability remains a challenge. The reduced cost of solar electricity has made electricity access affordable even to low-income households.

Back up power for home Malawi

Home battery backup systems, like the Tesla Powerwall or the LGES 10H and 16H Prime, store energy, which you can use to power your house during an outage. Batteries get that electricity from your ...

Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.
