SACRAMENTO - Governor Gavin Newsom today announced California achieved an historic milestone - the state was powered by two-thirds clean energy in 2023, the latest year for which data is available. California is the largest economy in ...

These adverse state policy impacts exacerbated financing shifts, triggering plummeting demand and an 80% decrease in rooftop solar installation volume. The California Solar & Storage Association reports that the fallout ...

EDPR NA Distributed Generation, the distributed generation business of EDP Renewables North America, and California Water Service have signed a 20-year PPA for a 2.35-MW DC onsite solar array at Cal Water's Northeast Bakersfield ...

Recurrent Energy is one of the world's largest and most geographically diversified utility-scale solar and energy storage project development, ownership and operations platforms. With an industry-leading ...

Sources of clean energy include generation from solar, wind, hydro, nuclear, geothermal and biomass. In 2024, the state added a record-breaking 7,000 megawatts (MW) of clean capacity to the grid, representing the largest single ...

California has introduced a total of 25,000MW of new energy means to its grid since 2019, a majority being solar and battery storage. These efforts align with Newsom's plan to add ...

California has officially achieved a landmark milestone: solar power frequently dominates electricity generation within the state. This isn't a future prediction; it's a recurring reality, ...

The Williamson Act, designed to protect California's farmland, has become a contentious subject in light of the state's growing need for solar energy. As the demand for renewable energy sources rises, many experts argue that the act ...

For Californians seeking clean energy solutions and relief from rising electricity costs, the Self-Generation Incentive Program (SGIP) offers a compelling opportunity. Since its inception, SGIP has provided significant ...

The solar day over the course of July 2025. From bottom to top, the black lines are the previous solar midnight, sunrise, solar noon, sunset, and the next solar midnight. The day, twilights ...

As I'll explain here, this 22% difference in Peak Sun Hours will equate to a 22% difference in solar energy

Bangui california solar energy

production. In solar energy applications, what truly counts isn't the hours between sunrise and sunset in a ...

Transparent solar windows that capture ultraviolet and infrared light are now available in the US, enabling buildings to generate clean energy while maintaining aesthetic appeal.
