

In the realm of renewable energy, Clenergy has established itself as a frontrunner among utility-scale solar developers. With a commitment to innovation, Clenergy offers some of the most ...

Deciding between central inverters and power optimizers for utility-scale solar projects involves careful consideration of several factors including efficiency, cost, and the specific ...

TotalEnergies Starts Up its Largest Utility-Scale Solar Farms with Batteries in the United States Houston/Paris, September 30th 2024 - TotalEnergies has started commercial operations of Danish Fields and ...

Better known for its strengths in the commercial and industrial (C& I) rooftop solar segment, Northern Solar is entering the utility-scale solar space with a strategic focus on Corporate ...

Utility-scale solar farms are vast installations designed to generate solar power at a massive scale, typically selling the electricity produced to the grid. These facilities differ significantly ...

Recurrent Energy is one of the world's largest and most geographically diversified utility-scale solar and energy storage project development, ownership and operations platforms. With an industry-leading ...

The utility-scale solar industry continues to demonstrate remarkable momentum, with 9 GWdc of new capacity installed in Q1 2025 alone. While this represents a 7% decline from the previous year, the sector remains a cornerstone of the ...

Trinasolar, a global leader in smart PV and energy storage solutions, signed a Memorandum of Understanding (MoU) with Solaris Energy Ltd., a leading solar distributor in Sri Lanka, to ...

SPW talks with tax expert: Utility-scale solar is not hit as bad as you think Senate budget bill still provides runway for utility solar incentives, especially paired with storage. By Kelsey Misbrener ...

What utility-scale solar project developers should know about One Big Beautiful Bill Developers will need to navigate expiring tax credits, stricter "safe harbor" rules and foreign content ...

Recurrent Energy has completed the development of approximately 11.5 gigawatts (GWp) of operating utility-scale solar projects and more than 3 gigawatt hours (GWh) of energy storage projects across six continents. We ...

Solar power is going to play a huge role in the future of the Irish energy industry, with at least 8GW of

Banjul utility-scale solar

capacity to be delivered by 2030 according to current targets. This will come through multiple pipelines, from small scale ...

The Brechin Castle Solar Ltd, a joint venture partnership between bp (35 per cent), Shell (35 per cent) and NGC (30 per cent), has achieved first electrons from the nation's first utility-scale ...

Solar Power World, the leading solar publication covering technology, development and installation, publishes the Top Solar Contractors List annually. The list includes hundreds of solar contractors and developers in ...

Trinasolar, a global leader in smart PV and energy storage solutions, signed a Memorandum of Understanding (MOU) with Solaris Energy (Pvt) Ltd., a leading solar distributor in Sri Lanka, to ...

Global average solar LCOE stood at \$0.043/kWh in 2024, says IRENA The International Renewable Energy Agency's latest report finds little change in the global average levelized cost of electricity for utility-scale solar ...

Peak production is one of the shared goals of stakeholders across the utility-scale solar value chain, but with site conditions becoming increasingly challenging, it's a more complex goal ...

Arevon Energy, a developer, owner and operator of utility-scale solar and energy storage projects, announced the closing of a \$600 million credit facility to support its renewable energy project ...

ABB has earned the UL98B certification for its 2,000-V OTDC switch-disconnector, the first to do so in the renewable energy industry. Over the last 20 years, solar systems have evolved to ...

Lazard's analysis of levelized cost of electricity across fuel types finds that new-build utility-scale solar, even without subsidy, is less costly than new build natural gas, and competes with ...

Utility-scale solar projects are continuing to advance across the United States. Solar represented 77.7% of new capacity added to the U.S. grid in 2025 through April, according to the Federal Energy Regulatory Commission, and continues ...
