Northvolt is Europe's most-funded homegrown lithium-ion battery company and has attempted to set up manufacturing and battery material projects across ...

The U.K.'s strategic location offers battery companies access to European markets, further expanding their growth potential. Another factor propelling the growth of battery companies in the U.K. is the rise of electric vehicles (EVs). As the U.K. aims to phase out petrol and diesel cars by 2035, the demand for EV batteries will surge.

Founded in 2017, the company aims to provide the world's most sustainable battery cells and establish a European battery supply chain. Northvolt's mission is to manufacture batteries with a 90% lower carbon footprint than those produced with coal energy, using clean, renewable power in their factories.

Post-Inflation Reduction Act (IRA), growth in planned US production capacity started to outpace Europe's, leading major EU policymakers to call for action to "to prevent an outflow of investment" from its battery ecosystem. What hasn't been as concretely clear is whether these are due to respective ramping up and down of existing plans or the US taking ...
