

China's BYD said on Tuesday it delivered 382,585 vehicles globally in June, marking a 10.5% increase from the same month last year. Of the total, 377,628 were passenger vehicles, ...

A new report by the International Council on Clean Transportation (ICCT) finds that battery electric vehicles (BEVs) produce significantly fewer greenhouse gas (GHG) emissions than ...

The UK government has reconfirmed its plans for a ban on pure petrol and diesel vehicle sales by 2030, with hybrid vehicles following in 2035 for cars, leaving only zero emissions vehicles, of ...

China continues to dominate global EV adoption, with battery electric vehicles (BEVs) expected to reach 30% market penetration by 2025. When including hybrids and extended-range electric ...

The European Commission announced on Wednesday that Chinese-made battery electric vehicles, or BEVs, will soon be subjected to punitive countervailing tariffs, after the conclusion of the bloc's anti-subsidy ...

The project consortium, coordinated by an Austrian Research Institute, is looking for a company (SME or bigger) acting as Original Equipment Manufacturer, who can cover all vehicle-related ...

The transportation sector accounts for a substantial proportion of energy consumption and greenhouse gas emissions globally. Electrification of transportation systems has emerged as a ...

The decarbonization of transport is crucial for meeting global climate goals, and FCEVs offer promising advantages over traditional battery electric vehicles (BEVs), including:

In the first half of the year, more than 5.9 million battery electric vehicles (BEVs) were registered worldwide, a 37% increase compared to the same period in 2024. For comparison, full-year sales in 2024 had only grown by around 14%. China ...

Ventas de vehículos electrificados crecieron 67 % en Colombia en el primer semestre de 2025 En el acumulado al cierre de junio, este segmento de automotores acumuló casi 33.000 unidades ...

However, energy stored in batteries are charged exclusively through regenerative braking. Battery Electric Vehicles (BEVs) use only electric motor to power the vehicle and contain batteries ...

A Biden administration plan to create a green fleet of postal vehicles has built only 250 electric mail trucks in more than two years, amounting to a multibillion-dollar "boondoggle ...

Battery electric vehicles bevs colombia

Imports of battery electric vehicles (BEVS) fell by more than 50 per cent in value during the 12 months to June 2025, when compared with the year prior, according to Stats NZ. The total value of passenger motor vehicle imports for the past ...

Registrations of vehicles with plugs rose strongly as battery electric vehicles (BEVs) jumped 39.1% to 47,354 units, equivalent to a quarter (24.8%) of the market, and plug-in hybrid electric vehicles (PHEVs) grew 28.8% to 21,382 ...

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...

Regional differences stem from pricing and battery strategies, with China leveraging low-cost LFP batteries, while the U.S. and Europe focus on range and charging performance. As ...

Fuel cell vehicles (FCVs), which convert hydrogen into electricity via an electrochemical reaction, offer several benefits compared to internal combustion engine (ICE) vehicles and battery ...

The commission said it "has provisionally concluded that the BEVs (battery electric vehicles) value chain in China benefits from unfair subsidization, which is causing a threat of economic injury to EU BEV producers".

Battery electric vehicles bevs colombia
