

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...

Introduction As governments and industries seek to decarbonize logistics, two major contenders have emerged in the race for sustainable long-haul trucking: battery-electric vehicles (BEVs) ...

The project consortium, coordinated by an Austrian Research Institute, is looking for a company (SME or bigger) acting as Original Equipment Manufacturer, who can cover all vehicle-related ...

This figure included 700 billion yen of investments in human resources, including suppliers and dealers, as well as growth areas such as battery electric vehicles (BEVs), hydrogen, and ...

Electric vehicles (EVs) are revolutionizing the way we think about transportation, offering an eco-friendly alternative to traditional gasoline-powered cars. These vehicles run on electricity ...

The forecast period (2025-2033) anticipates significant market expansion across various segments, including battery electric vehicles (BEVs), plug-in hybrid electric vehicles (PHEVs), ...

The exponential increase in Battery Electric Vehicles (BEVs), which are equipped with large lithium-ion batteries, and Plug-In Hybrid Electric Vehicles (PHEVs) operating on the road will necessitate the implementation of high ...

However, North America is expected to witness a significant Electric Vehicle Sensor Market Share during the forecast period, owing to the penetration of battery electric vehicles (BEVs) across ...

Nissan CEO Ivan Espinosa (Nissan) Nissan pursued a questionable goal early in this century of becoming the innovative leader in battery electric vehicles (BEVs), debuting its Leaf model in 2010.

The global lithium-ion battery market for all-electric vehicles (EVs) is experiencing robust growth, driven by the escalating demand for electric vehicles worldwide. Governments' stringent emission regulations and increasing consumer ...

These components are specifically designed for automotive batteries used in battery electric vehicles (BEVs) and plug-in hybrid vehicles (PHEVs), with the expansion finalized as of June ...

Fuel cell vehicles (FCVs), which convert hydrogen into electricity via an electrochemical reaction, offer several benefits compared to internal combustion engine (ICE) vehicles and battery ...

Hyundai Motor India gets INR517 crore GST demand and penalty order Sona Comstar is already the largest supplier of differential assemblies for battery electric vehicles (BEVs) in North America ...

The journey toward clean mobility has defined much of the past decade. Electrification has moved from niche to mainstream, with battery electric vehicles (BEVs) and plug-in hybrids gaining ...

The decarbonization of transport is crucial for meeting global climate goals, and FCEVs offer promising advantages over traditional battery electric vehicles (BEVs), including:

Based on the propulsion type segment, the market is segmented into Battery Electric Vehicles (BEVs) and Hybrid Electric Vehicles (HEVs). The BEV segment is expected to hold a notable market share and grow further due to ...

There are 79 Electric Vehicles startups in Japan which include Luup, SkyDrive, Striemo, Mabuchi Motor, GS Yuasa Corporation. Out of these, 23 startups are funded, with 14 having secured Series A+ funding. Over the past ...
