Will Kazakhstan gain market share in battery materials?

The country wants to gain market share in battery materials such as lithium, cobalt, manganese, nickel and graphite amid rising demand for the materials, Sharlapaev said. Kazakhstan already mines manganese, but last year it launched processing of manganese sulphate and aims to eventually capture 10% of the global market for the battery material.

Did European Bank buy a stake in a graphite company in Kazakhstan?

The European Bank for Reconstruction and Development said last month it had bought a stake in a firm exploring for graphite in Kazakhstan.

When the battery is charged to 100%, EPS mode is working fine, but when we set a charge lvl to e.g. 80% input are greater than output for 2-7 watts, on screen I see eternal charging state for 2 days and battery temperature is growing (I think battery is really charging with this load). Charging stops only when I disable AC sockets.
