Bolivia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Energy concept development for campus-scale development and real estate portfolio projects with specific environmental and economic goals; Building permit applications and third-party sustainability certification submissions (e.g. LEED, Green Globes, Energy Star, Living Building Challenge) requiring energy model and associated documentation;

Baumann energy Bolivia

In Latin America, Bolivia is taking some first small steps to develop small storage energy systems to support the national grid. The solar plant Cobija in the northwestern part of Bolivia first connected to the grid in September 2014 and has a 5 MW capacity. It is an exciting new project because it has a 2.2 MW lithium-battery storage system.

Baumann's energy audits follow the structured approach of ASHRAE Standard 211-2018 for identifying and analyzing potential measures, economics, and implementation of energy efficiency projects in existing facilities. Our energy audits are meant to inspire and enable action and provide a custom plan for implementation.

The BAUMANN ENERGY 3kVA/24V Hybrid IVEM Inverter is a versatile power solution designed for medium-sized off-grid solar systems and backup applications. It integrates advanced IVEM (Intelligent Voltage Energy Management) technology to efficiently manage energy from solar panels, batteries, and the grid.
