The financial markets hope that the Ukraine conflict will soon be replaced by "business as usual". They appear to have got used to the war, as it has not escalated any further to date. Nevertheless, the current state of the conflict, which could last for an extended period, is set to keep inflation historically high. What does it mean for corporate profits and the global economy?

Russia launched a widespread attack on Ukraine's energy infrastructure overnight, forcing the country to implement emergency power outages, Ukrainian authorities said on Friday. "The enemy ...

Ukraine: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Ukraine extracts about 20 billion cubic meters of fossil gas each year, and since 2022 this has almost met demand. [14] Ukraine has been estimated to possess natural gas reserves of over 670 billion cubic meters (in 2022), [15] and gas is an important part of energy in Ukraine. In 2021, Ukraine produced 19.8 billion cubic meters (bcm or Gm³) of natural gas.
