

Painted beehive panels are an essential element in the history of Slovenian beekeeping and even in the history of Slovenian folk spiritual culture. These panels are the same to the fine arts as songs and tales are in literary folk art. But the images from beehive panels tell a special story of Slovenian history, ideas, beliefs and customs. They are unique historical records.

Slovenian bees circle the world. Ljubljana, 24 May 2018 - To celebrate the first World Bee Day properly, the Slovenian Tourist Board organised a press trip, which was attended by renowned foreign media. The images of our green, active and healthy country and the stories of the tireless Carniolan honeybee and Slovenia's efforts to ensure its survival circled the entire ...

Bee Solar will develop and deploy GW scale manufacturing capacity in Europe with the lowest carbon footprint, considering a vertically integrated plant from ingot, wafers, cells and modules. Bee Solar is engaged to support the development of a regional ecosystem and supply chain, covering the polysilicon and other critical sub-components with ...

Slovenia's area and population are 0.2% and 0.6% (respectively) of that of the U.S. Relative-size of Slovenia compared to North Carolina (rough estimate; it should be shown a little smaller). See some other map comparisons on page 13. From the capital of Ljubljana in central Slovenia, one can be anywhere within 2 hours by car.

The SolarWise garden in Ramsey, Minnesota, doesn't look especially cutting edge as solar farms go. But in April, it quietly achieved a milestone: It became the first U.S. solar facility to host ...

Bees, and the relationship between bees and mankind, have a special place in Slovenian tradition and modernity. Slovenian beekeeping is distinguished by a centuries-old and world-famous tradition. This is also evidenced by the fact that 20th May, the birth date of the Slovenian beekeeper Anton Jansa was declared World Bee Day in 2017. The Museum of Apiculture in ...

The most important person for apitherapy in Slovenia at the end of the 19th century was Dr Filip Terc, a doctor of Czech descent practising in Maribor. As early as 1879 he started the experimental treatment of rheumatic diseases with bee stings (apitoxin). He tried this therapy on 660 patients and is considered the pioneer of modern apitherapy in the history of ...

There are more than 10,000 beekeepers in Slovenia, and about 8000 in the Slovenian Beekeepers' Association. Sadly, we produce less honey each year, although the number of beekeepers is growing. Two thousand tonnes per year is, unfortunately, not enough. Our goal is to produce more as the Slovenian consumer deserves Slovenian honey.

In honor of the UN's World Bee Day, Hanwha Group has introduced South Korea's first-ever Solar Beehive, a photovoltaic low-carbon solar beehive that uses electricity generated from solar energy. As the damaging effects of the climate crisis compound across the globe, the population of bees - the world's most important pollinators ...

Today, he runs a honey farm in Pilstanj in eastern Slovenia, where he tends to more than 100 bee colonies. He also heads the breeding program for the 8,000-member Slovenian Beekeepers' Association, a nearly 150-year ...

monocrystalline silicon solar panel with inbuilt 800mAh rechargeable battery; When the built in NiMH battery saves enough solar energy in the daytime, the string lights can automatically work for 8 to 10 hours at night, no extra ...

Slovenia is the only European country where beekeeping is only permitted with indigenous honey bees. Due to its peaceful nature, good orientation, immunity to diseases and other qualities, kranjska sivka is popular around the world. In Slovenia, the bee lives in typical original hives with painted panels. The quality of its products has been ...

A bee house is a building or a place in which we put beehives under a common roof. In beekeeping with stacked beehives, the bee house has become indispensable. The most suitable form of bee house is a wooden agricultural building. Wood is the most suitable material to provide the best living conditions for bees. Wood enables a relatively simple and cheap prefabricated ...

The most important person for apitherapy in Slovenia at the end of the 19th century was Dr Filip Terc, a doctor of Czech descent practising in Maribor. As early as 1879 he started the experimental treatment of rheumatic ...

Beekeeping is in our genes. Slovenians have always been bee experts. The most important figure of Slovenian beekeeping is Anton Jansa, the first beekeeping teacher at the Vienna imperial court, who in the 18th century completely revised the hitherto beekeeping methods based on his findings and laid the foundations of modern beekeeping.
