ERK Eckrohrkessel GmbH grants licenses to manufacturers and engineering companies for the production of corner tube systems, without any geographical restrictions; these licenses can be expanded to include fuel engineering (fluidised bed, two-stage combustion) systems.

Energy in Belarus describes energy and electricity production, consumption and import in Belarus. Belarus is a net energy importer. According to IEA, the energy import vastly exceeded the energy production in 2015, describing Belarus as one of the world's least energy sufficient countries in the world. Belarus is very dependent on Russia.

Universal energy is the energy that sustains life, providing vital energy to all living systems. The whole Universe, starting from the stars in the sky to the atoms that create them, including the world we live in and our bodies, everything we see or do, is made up of the Universal Energy, at the most fundamental level.

So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human wellbeing and rising living standards. Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product.

Ensuring justice for victims of international crimes in Belarus in the national law enforcement systems of other states on the basis of the universal jurisdiction has been recommended in reports and resolutions by many inter-governmental organisations. This avenue has been hailed as an effective instrument to deal with

Given that the energy sector has historically focused on supply and economic growth with limited consideration for environmental or social impacts, addressing these challenges now requires a multi-pronged approach rooted in cross-sector collaboration. Distributed energy systems must be designed to meet the current and future needs of all sectors
