

Bouvet Island viking power

Where is Bouvet Island?

Bouvet Island (/ˈbuːveɪ /BOO-vay; Norwegian: Bouvetøya [bu'vè:oeY?]) is an uninhabited subantarctic volcanic island and dependency of Norway. It is a protected nature reserve, and situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, it is the world's most remote island.

Who discovered Bouvet Island?

Bouvet Island was discovered in 1739 by the French navigator Jean-Baptiste-Charles Bouvet de Lozier (1705-86), for whom it is named. It was rediscovered by a German expedition in 1898, and Norwegian expeditions to the Antarctic in the 1920s claimed it for Norway as a potential whaling station.

How did Bouvet Island become a dependency?

The expedition carried out aerial photography of the island and was the first Antarctic expedition to use aircraft. : 64 The Dependency Act, passed by the Parliament of Norway on 27 February 1930, established Bouvet Island as a Norwegian dependency, along with Peter I Island and Queen Maud Land.

How long did it take a boat to get to Bouvet Island?

The boat must have arrived after 1955 as the shelf did not exist before that. It could not have made a sea journey of any length. Whoever used the boat to get to Bouvet Island, left no other trace, but did have enough man power to drag a heavy boat 30 meters over rough stones away from the sea.

Why is Bouvet Island important?

The historical significance of Bouvet Island heightened in the early 20th century. In 1927, Norway's interest in the island was piqued, largely due to its strategic importance in the Southern Ocean. This led to an expedition led by Harald Horntvedt, which resulted in Norway laying claim to the island in December of the same year.

When did Norway claim Bouvet Island?

In 1927, the first Norwegian expedition landed on the island, and claimed it for Norway. At that point, the island was given its current name of Bouvet Island ("Bouvetøya" in Norwegian). In 1930, following resolution of a dispute with the United Kingdom over claiming rights, it was declared a Norwegian dependency.
