

eCap Marine says it will supply 8 MW of hydrogen fuel cell systems for four zero-emission vessels under construction for Norway's Møre Sjøø and logistics firm Samskip, with deliveries expected ...

Hydrogen, for example, can play a key role in reaching net-zero, as a carbon-free energy carrier. Low-carbon hydrogen, produced using CCS, can help decarbonise the transport sector and be ...

Long-range trucks, distributing essential goods to people across Europe, will fill up on clean hydrogen on their journeys. And renewable energy producers will be able to use hydrogen as a means of storage to avoid ...

This consultation focuses on the proposed scenarios for Belgium's future energy demand and supply, including the underlying input data, assumptions, and methodology that will shape the ...

And renewable energy producers will be able to use hydrogen as a means of storage to avoid wasting power where it would otherwise be curtailed! For example, Germany lost EUR4.2 billion worth of renewable power last year to ...

Google enters long-duration energy storage (LDES) with a global commercial partnership and investment in Energy Dome. Energy Dome's CO₂ Battery stores clean energy for 8-24 hours, ...

This paper proposes a two-layer, multi-step optimal sizing framework for electric-hydrogen energy storage to address multi-scale energy storage requirements. The first step, the optimal sizing ...

Fixing Belgium's energy conundrum Belgium relies on imported fossil fuels for much of its energy supply, a precarious condition given its hopes for the green transition and concerns about energy security. The country is ...

Two Republican senators likely saved tax credits for hydrogen energy in the megabill. A software startup is trying to tackle AI demand on the grid using demand response. That's it for today, folks!

With the "green energy transition" high on the international agenda as world leaders convene at COP28 to discuss how to overhaul global energy systems and cut dependence on fossil fuels, momentum is growing to invest ...

IDTechEx Research Article: The future of energy could be increasingly streamlined, sustainable, and efficient, with battery developments and the integration of machine learning. This article explores the future of energy, from ...

Brussels hydrogen energy storage
