Who is akaysha energy?

Akaysha Energy, the BlackRock Inc (NYSE:BLK)-backed Aussie battery energy developer, has clinched a revenue swap and risk hedging deal for its 155-MW/300-MWh Ulinda Park battery energy storage system (BESS) in Queensland. Battery energy storage complex. Image by: Akaysha Energy @LinkedIn.

Does akaysha have a battery energy storage project?

Akaysha, which was acquired by BlackRock Real Assets in August last year, has several battery energy storage projects across the NEM, among which is the 909 MW/1,915 MWh Waratah Super Battery in New South Wales. In November, it took a FID for its 150-MW/300-MWh Ulinda Park BESS project in Queensland. Choose your newsletter by Renewables Now.

Did Blackrock buy akaysha energy?

US-based investment giant BlackRock has acquired Akaysha Energy, an Australian firm that has more than 1GW of energy storage capacity in its portfolio. The financial details of the deal have not been disclosed. BlackRock has committed to investing more than A\$1bn (\$700m) to support the development of battery storage assets in Australia.

What is akaysha doing now?

Akaysha, which was acquired by BlackRock Real Assets in August 2022, is working on battery storage projects across the National Electricity Market (NEM), including the 909 MW/1,915 MWh Waratah Super Battery in New South Wales and the 150-MW/300-MWh Ulinda Park BESS in Queensland. Akaysha Energy Pty Ltd, the BlackRock Inc -backed Aussie battery energy developer, has been granted permits to build two battery energy storage systems (BESS) in Victoria and Tasmania totalling 300 MW/1,000 MWh.

Akaysha is a dedicated builder-owner-operator of mega-scale Battery Energy Storage Systems. With our combined expertise in energy markets, technology, development and capital solutions, we will unlock the energy future, ensuring global access to clean, reliable, and affordable energy solutions for all.

Akaysha is proposing to deploy a large-scale BESS near Wellington in central-west NSW. Known as the Orana BESS, it will have a capacity of 415MW and provide 4 hours or 1660MWh of energy storage. Akaysha is preparing to commence construction activities including road upgrades at the intersection of the site access.

We stand before you today, united by a vision to lead the energy transition towards a better, brighter tomorrow. If you are looking to join a team where the work you do makes a real and very tangible impact on the future of the planet and its people, we'd urge you to not only check out our open roles, but apply for one today.

Akaysha Energy commenced construction on a \$200 million Brendale Battery Energy Storage System. The company also closed an AU\$650 million deal for a 1.6GWh+ Australia BESS project. Additionally, Akaysha Energy secured an AU\$250 million debt deal and was awarded a contract for a 2GWh project.

Akaysha Energy, the battery storage developer owned by United State-based investment giant BlackRock, has reached a final investment decision (FID) and finalised a balance of plant contract for the \$150 million (USD 96.3 million) Ulinda Park project which will include a 150 MW battery, with two hours of storage at maximum output.

Akaysha is developing an advanced 100MW/200MWh BESS at the Palmerston Terminal Station in Tasmania. The BESS facility is intended to use the latest grid forming inverter technology offering Virtual Synchronous Machine (VSM) services to the Tasmanian network.

Nick Finch, Chief Engineer at Akaysha says this is a significant milestone for the Waratah Super Battery as it moves towards the testing and commissioning phase, "Completion of Waratah's connection process and registration of the NEM's largest single DUID at 850MW has taken an incredible amount of collaboration between AEMO, Transgrid, Aurecon, EKS, Powin, ...

Introducing the world's most powerful mega-scale battery storage systems; Australian born for the betterment of the planet and its people. Together, we are working with communities and project partners both locally and around the globe to ensure that every tomorrow is better by focusing on enhancing human life through the delivery of new energy today.
