The number of residential solar panel installations in Burkina Faso is not precisely documented. However, by the end of 2021, Burkina Faso had about 62 MW of installed solar capacity, with ongoing efforts to expand this further through various projects funded by international organizations like the World Bank.

The findings of this study indicate that a significant portion of Burkina Faso's land area is suitable for solar PV and wind development. It suggests a maximum development potential of approximately 95.9 and 1.96 gigawatts (GW) for solar PV and wind projects, respectively.
