north-east of Burundi. Guided by a strategy focused on finding, developing, and streamlining assets, we have a proven track record of creating value for shareholders. What we do Tanganyika Gold S.A. is focused on the exploration and development in high-grade ...

The losses represented 30% of produced energy. The potential of production of 300 MW in exploitable hydro energy in Burundi can be observed through its geographical relief and the abundant precipitation. Burundi carries an important hydro-electric power potential, but only exploits slightly more than 10 % of this (32 MW).

Burundi: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
