

International growth in submarine cables for offshore wind projects, with significant plants and contracts in Asia and Europe. Landmark projects such as East Anglia THREE demonstrate the ...

Jan De Nul Completes Thor Export Cable Pull-In Jan De Nul has pulled two export cables for the 1,080 MW Thor offshore wind farm, currently under construction in Denmark. The export ...

Axess Technologies has been awarded a contract by Hellenic Cables for cable installation work on the Ostwind 3 project in the German Baltic Sea. The project scope includes planning and installing 66 kV and 220 kV ...

New research project looking to minimize failure and repair costs of floating wind dynamic cables, mooring lines (offshore-energy ) A new project has been launched in the UK to improve the ...

Jan De Nul has pulled two export cables for the 1,080 MW Thor offshore wind farm, currently under construction in Denmark. The export cables will transport clean, renewable electricity ...

Taihan Cable and Solution has completed the installation of export cables for the Yeonggwang Nakwol offshore wind project in South Korea. Taihan said the project, located near Songido in ...

The laying of the subsea cable that connects the DolWin epsilon platform to land has been completed. The platform and the cables, part of TenneT's DolWin5 grid connection, will transmit the electricity generated by ...

The decision to pull the Victorian project comes just weeks after The Australian first revealed that BlueFloat was seeking a buyer and underscores the growing difficulties for offshore wind ...

UK-based manufacturer of subsea and power cables, JDR Cable Systems, part of TFKable Group, has finished the type test qualifications for next-generation subsea cables designed for ...

As well as supporting the T& I of the offshore substation (2200t 4-leg jacket & piles and 3250t topside), ABL will support cable pull-in, laying and protection operations for two 16-kilometre ...

Jan De Nul Completes Thor Export Cable Pull-In. Jan De Nul has pulled two export cables for the 1,080 MW Thor offshore wind farm, currently under construction in Denmark. The export cables...

South Korean subsea cable manufacturer LS Cable & System has completed the construction of what it says is the largest high-voltage direct current (HVDC) cable production facility in Asia.

## Cable pull in offshore wind

Cable-laying work has been completed for EnBW's 960-megawatt He Dreiht offshore wind farm, marking a major milestone in Germany's largest offshore wind project, Seaway7 said on ...

Construction activities continue on new offshore wind farms, with all export cables now in place at the Yeonggwang Nakwol offshore wind project in South Korea and all monopiles installed at ...

In addition to supporting the T& I of the offshore substation, which consists of a 2200t 4-leg jacket and piles, as well as a 3250t topside, ABL will also assist with the cable pull-in, laying and ...

As well as supporting the T& I of the offshore substation (2,200-tonne four-leg jacket and piles, and 3,250-tonne topside), ABL will support cable pull-in, laying and protection operations for two ...

Improving the effectiveness of mooring lines and dynamic cables on floating offshore wind farms is the focus of a new project commissioned by the Offshore Renewable Energy (ORE) Catapult.

Taihan's cable laying vessel (CLV), PALOS, has successfully completed the installation of export cables for the 364.8 MW Yeonggwang Nakwol offshore wind farm in South Korea. The project, ...
