

# Cabo Verde triangle power solutions

Why is Cabo Verde a good place for wind power?

The Cabo Verde archipelago is one of the best sites for wind power generation since it is located in the northeast trade winds belt. Wind power was first deployed here in 1994. The government set a target to generate 50% of its energy from renewable energy sources by 2020 and ultimately, 100%. This was due to:

Does Cabo Verde have a photovoltaic power plant?

Excess energy produced in the photovoltaic power plant is used by fishermen for refrigeration purposes. Monte Trigo is the only 100% green village in Cabo Verde. The diesel generator previously used has barely been used since the completion of the project in 2012.

Does Cape Verde have solar power?

In 2012 Cape Verde had an installed electricity generation capacity of around 300 MW, of which about 24% from wind power plants and 3% from photovoltaic stations. While solar power has an enormous potential as a source of renewable energy, natural conditions in Cape Verde are one of the best in the world for the production on wind energy.

Is Cape Verde a viable alternative to fossil fuels?

Solid waste can also represent an adequate option while ocean and geothermic energy are being tested, with uncertainties remaining as to their efficiency. Cape Verde has an estimated potential of 2,600 MW of renew-able energy, and more than 650 MW have been studied in concrete projects, which have lower production costs than fossil fuels.

O Cabo Verde Triangle Trail s&#227;o em 3 etapas de caminhada, 3 etapas de trail curto e longo, um ultra trail e um Semin&#225;rio, com uma dist&#226;ncia total... O Cabo Verde Triangle Trail s&#227;o em 3 etapas de caminhada, 3 etapas de trail curto e longo, um ultra trail e um Semin&#225;rio, com uma dist&#226;ncia total aproximada de 102 KM!
