As I'll explain here, this 22% difference in Peak Sun Hours will equate to a 22% difference in solar energy production. In solar energy applications, what truly counts isn't the hours between sunrise and sunset in a ...

Through the first five record-setting solar and battery months of 2025, 11.5% of California's potential solar generation was curtailed to maintain grid balance. That's down from 13% over ...

Recent estimates suggest that converting between 1.1% and 2.4% of the country's farmland to solar arrays would, along with other clean energy sources, generate enough electricity to ...

Solar Optimum, a leading force in renewable energy, is proud to announce its monumental achievement of retaining the coveted #1 California Residential Solar Contractor (EPC) ranking ...

Residential Solar Permit Reporting Program - SB 379 The Energy Commission's reporting hub for California cities and counties to annually provide data about online, ...

Sources of clean energy include generation from solar, wind, hydro, nuclear, geothermal and biomass. In 2024, the state added a record-breaking 7,000 megawatts (MW) of clean capacity to the grid, representing the largest single ...

A unit of EDP Renewables (EDPR), part of Portuguese utility group EDP Energias de Portugal SA (ELI:EDP), will supply power from an on-site distributed solar farm to California Water Service ...

Unlike non-renewable energy sources, solar power is infinitely renewable, environmentally friendly, and available in plenty across California's expansive territories. Beyond natural ...

The California solar mandate is a critical regulation shaping the future of homebuilding and solar energy in the state. As part of California's broader clean energy goals, this solar panels California law requires that most ...

These adverse state policy impacts exacerbated financing shifts, triggering plummeting demand and an 80% decrease in rooftop solar installation volume. The California Solar & Storage Association reports that the fallout ...

Transparent solar windows that capture ultraviolet and infrared light are now available in the US, enabling buildings to generate clean energy while maintaining aesthetic appeal.

EDPR NA Distributed Generation, the distributed generation business of EDP Renewables North America, and California Water Service have signed a 20-year PPA for a 2.35-MW DC onsite solar array at Cal Water's
