What are Cambodia's goals for solar energy?

With these opportunities in mind, the government has set ambitious targets for expanding solar energy in Cambodia, aiming to inject 2 GW of solar energy into the grid by 2030. This goal is supported by a range of policies designed to facilitate the growth of the solar sector, including incentives for investment and development.

Does Cambodia have a potential for solar energy?

Cambodia has strong potential for solar energy, in fact some of the most robust levels of solar irradiation that can provide the country an opportunity to meet growing electricity demands in an economical, innovative and sustainable way. The RGC seeks to best realize this potential and operationalize the goals set out by the RS4.

How much does solar energy cost in Cambodia?

One of the promising traits of solar energy in Cambodia is its cost. The average electricity price for solar power is around USD 0.03 per kW, significantly lower than that of coal, which is USD 7.7 per kW.

Why are Cambodians investing in solar energy?

Cambodian households and businesses are also increasingly investing in behind-the-meter (BTM) solar energy systems as they're much easier and faster to deploy and costs are lower than utility grid rates, market analysts highlight. Photovoltaic electricity potential in Cambodia. &#169; 2017 The World Bank, Solar resource data: Solargis.

Is Cambodia a solar power hotspot?

Cambodia's geographical location and climate conditions position it as a solar power hotspot with potential that surpasses many of its regional neighbours. Studies show that the country receives a daily solar irradiance of 5 kWh per square m and an average of eight hours of sunlight daily.

Will increasing solar power boost Cambodia's exports?

Aligned with achieving sustainable agriculture, energy and general improvement in livelihoods and living conditions, Cambodian Rice Federation (CRF) secretary-general Moul Sarith reportedly said that increasing solar power generation would help reduce electricity costs and boost the Kingdom's exports.

Clean Energy Week 2023 was held from November 16-23 and featured 25 events focusing on various topics within Cambodia's clean energy transition.
