

EnergyNow.ca is an energy news media service dedicated to providing information on the Canadian energy sector's latest news, technology, innovations, commentaries, events, data and press releases. From oil & gas, ...

The Canada Power Market is expected to reach 158.34 gigawatt in 2025 and grow at a CAGR of 3.60% to reach 189 gigawatt by 2030. Hydro-Québec, Ontario Power Generation, TC Energy Corp., Brookfield Renewable ...

Shopping for an electric bike--or unlocking one you already own--means knowing exactly where Canada draws the legal line. National rules cap motors at 500 watts and 32 km/h, but every province adds its own age limits, helmet ...

CSA C22.1-2021 Canadian Electrical Code, Part I (25th Edition), Safety Standard for Electrical Installations

Canada's electricity grid will need major infrastructure investments to handle a projected doubling in load over the next 25 years. The Building Canada Act (Bill C-5), approved in June, gives...

Canada has committed to making its electricity grid net-zero by 2035. Achieving this will significantly reduce the carbon footprint of all Canadians. Every time a light is turned on, or an electric vehicle is charged, it will be done ...

This piece was first published by Energy Regulation Quarterly. View the original publication: Connecting data centres in Ontario: Key considerations and challenges, July 2025 - Volume ...

Canada's energy system is entering a pivotal decade. Electrification, which previously might have seemed like a far-off goal, has become a current priority in the energy sector. Driven by climate commitments, industrial decarbonization, ...
