

The research work includes optimized MPPT control, enhanced system effectiveness, rotor speed and torque control, grid-side control loop, grid support functions, and harmonic mitigation, which...

Key issues to address include grid stability, voltage control, short circuit power, and frequency control. A more flexible approach to the grid is needed, utilizing a combination of technologies such as flywheels, battery energy storage ...

WEG has announced the signing of contracts with Alupar for the supply of a transmission grid stabilization system for Chile. The scope includes a solution with synchronous condensers, ...
