What sets the Delta Pro apart from the other solar generators on the market is its ability to make 240v power and connect to a house through a transfer switch. It's also possible to use the EcoFlow Home Smart Panel which is like a transfer switch but will automatically transfer power from the Delta Pros to the house when the power goes out.

In addition to connecting your solar generator to your house, transfer switches make power utilization much more manageable. You are in total control, as you can shut off any unneeded power circuit to further maintain your energy supply. It can prove especially helpful in emergencies, where you will want to prioritize food and light sources. ...

Solar generators these days use lithium-ion batteries. There are two types: Li-ion NMC and LiFePO4 or lithium iron phosphate. Li-ion NMC batteries are lighter and cheaper. So solar generators using these types of batteries have easier portability. They are great for camping and outdoors. LiFePO4 batteries are heavier but they last much longer.

In this case, you can choose between a Jackery Solar Generator 3000 Pro or a Jackery Solar Generator 2000 Plus with TT-30 connectors.
