Burkina Faso: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Buildings come in a wide variety of shapes, sizes and purposes, so out-of-the-box fixes rarely lead to real energy savings. Our approach at Clear Energy is to evaluate all facets of a structure's energy use for our Energy Services Companies (ESCOs) and corporate clients and then offer a tailored solution that meets the budget and project goals.

Sub-Saharan countries like Burkina Faso constantly face challenges in adoption and diffusion of new energy-efficient solutions especially those with high initial costs. This research is focused on passive techniques which can be widespread in Burkina-Faso where appropriated solutions need to be adapted to the local economic context.

BURKINA Faso has taken a significant step towards energy independence with the arrival of Russian nuclear experts from ROSATOM in Ouagadougou to begin implementing West Africa's first nuclear power plant. The project aligns with President Captain Ibrahim Traoré's vision of equipping the nation with nuclear energy, a goal set in 2023 to reduce Burkina Faso's reliance ...
