external territory in the ...

We would expect a 6kW solar system in Home Island Cocos (keeling) Islands to produce 26.40kWhs of solar energy over the course of a year. How much this is actually worth depends on how much you pay for power and how much solar power you send to the grid. A 6kW solar power system is shown here - commonly 17 x 370W panels are used to get to 6.3kW.

The Cocos (Keeling) Islands (Cocos Islands Malay: Pulu Kokos [Keeling]), officially the Territory of Cocos (Keeling) Islands (/ ' k o? k ? s /; [5] [6] Cocos Islands Malay: Pulu Kokos [Keeling]), are an Australian external territory in the Indian Ocean, comprising a small archipelago approximately midway between Australia and Sri Lanka and relatively close to the Indonesian island of Sumatra.

We would expect a 6kW solar system in West Island Cocos (keeling) Islands to produce 26.40kWhs of solar energy over the course of a year. How much this is actually worth depends on how much you pay for power and how much solar power you send to the grid. A 6kW solar power system is shown here - commonly 17 x 370W panels are used to get to 6.3kW.

Saturday, five days out of Cocos, with the good winds we managed to sail 117 miles for the day. The best distance covered between Cocos and Indonesia. I discovered an unwanted passenger onboard. A Boobie, I think, seabird had somehow managed to land on the solar panels on the Binini during the night. The evidence was the white crap all over the ...
