

# Colombia solar land lease companies

The solar host (landowner) leases a portion of their property to a solar developer via a solar land lease. In exchange for using their land, the landowner receives ongoing revenue for the length of the lease term (typically 20-25 years). The developer will build a solar array on this leased land to generate energy for a specific off-taker.

Property owners are paid to lease their property to NextGrid or sell for cash -- often above market value.

"An option is a contract that gives the optionee a right to do something - such as buy or lease land-for a specified period of time," Dessy explains. "It does not give you an interest in the property, only the right to lease or buy it later.

Make sure the contract includes provisions that determine who is responsible for decommissioning the solar array. This will ensure that if your lease expires and is not renewed, the company goes out of business or sells the project, or the solar array is no longer viable, the system will be dismantled, and the land returned to its pre-lease condition.

Selecting and assessing the land. There are critical factors that you must evaluate when choosing land for a solar farm. The key components include proximity to a three-phase power line and substation as well as certain terrain.. Assessing the land to ensure it's suitable for the needs of a solar farm is the first step in prepping for leasing.
