

Cook Islands home solar panel battery

Solar panels supplied by the Australian Defence Force are helping Cook Islands Police address their financial troubles. At a time when the Police Service has been financially crippled by huge power costs, the Maritime Surveillance Centre (MSC) at Avatiu harbour has made major strides in reducing its operational costs.

Repairs to the solar power system in the northern group islands could take up to a year and residents need to conserve their power usage, says the Office of the Prime Minister (OPM). Solar power battery repairs "could take up to 12 months" - Cook Islands News

"Infratec chief executive Greg Visser said the four solar plants were now providing clean, reliable and affordable energy to almost 1500 people - or about 9 percent of the Cook Islands" population. "The solar panels, which are backed by battery storage, will meet about 95 percent of the islands" energy needs, he said.

A common misconception about solar panel systems is that they automatically continue to produce electricity if the grid goes down, so long as the sun is shining. All inverters are required to be able to be "anti-island." In other words, solar inverters are explicitly designed not to allow your solar panels to continue to push electricity into your home in the event of an outage.
