

How can Croatia become energy-independent and sustainable?

In order to become energy-independent and sustainable, Croatia counts on its abundant renewable energy resources. In February 2020, the Croatian government adopted a new Energy Strategy for the period until 2030, with an outlook through 2050.

What is Croatia's energy strategy?

In May 2019, the Croatian Government proposed a new national Energy Strategy to run until 2030, including an overview to run to 2050. The proposal is currently under public review. S0, a scenario with no further adjustments of measures, or changes to the regulatory framework; S1, a scenario of fast energy transition in Croatia and the EU;

Does Croatia have a national energy and Climate Plan?

To achieve its goal, Croatia set up a 2030 National Energy and Climate Plan. The national strategy aims at a 36.4% share for renewable energy by 2030 and significant investment across the energy sector, including hydropower, wind farms, solar photovoltaic plants, and hydrogen energy.

How can Croatia achieve a low-carbon economy?

Croatia wants to cut its CO₂ emissions by 45% by 2030 and to abandon coal by 2033. But the transition to a low-carbon economy won't be easy, requiring major investments in new energy infrastructure and increased renewable energy resources. To achieve its goal, Croatia set up a 2030 National Energy and Climate Plan.

Can energy projects make Croatia greener?

Several energy projects aim to make Croatia greener, ensure a secure energy supply, and improve lives in Zagreb. Just eight kilometres from the Kastel Benkovic, a medieval castle, the village of Korlat produces one of the finest red wines in both Croatia and Europe.

Is Croatia a good place for solar energy?

According to U.S. consulting firm BCG, Croatia has significant untapped potential for solar energy usage with one of the highest levels of solar radiation in Europe (3.4-5.2 kWh/m²day), but one of the lowest levels of installed photovoltaic capacity per capita (15.6 Wp).
