

Curaçao wind energy manufacturer

Does Curaçao use wind and solar energy?

Since the 1980s, Curaçao has been gaining experience in applying wind and solar energy. Curaçao also distinguishes itself from the world with regard to the application of wind and solar energy. In addition, the focus is also on the use of biogas, energy storage and energy savings. Bulbaai conducted an extensive research in Curaçao.

Does Aqualectra have a role in the energy transition in Curaçao?

Increasing capacity through wind energy is part of the Curaçao energy transition in which Aqualectra has a leading role. During the signing of the energy purchase agreement (PowerPurchase Agreement), both the management of Aqualectra and NuCapital underlined the mutual trust and good cooperation between the two companies.

Will Curaçao become a model for the region?

As soon as this Wind Farm starts producing electricity, Curaçao will position itself worldwide as the undeniable leader among the countries where 50% of their electricity production is generated by wind. This will put Curaçao at the forefront worldwide and our country will become a model for the region.

Where will Aqualectra's wind farm be located?

The wind farm will be located in Koral Tabak. Expanding electricity production capacity through wind energy is one of the methods that Aqualectra is introducing as part of its efforts to increase production capacity. Currently, 30% of Aqualectra's average annual production comes from wind energy.

How much power will a new PPA produce in Curaçao?

The three parks jointly have a possible power production of 67.45 MW. Now that the new PPA has been signed, technicians from Aqualectra and NuCapital will start the preparatory work necessary to realize this immense project for the benefit of the energetic future of Curaçao. This project involves an investment of approximately US\$50 million.

How can Aqualectra increase production capacity through wind energy?

Expanding electricity production capacity through wind energy is one of the methods that Aqualectra is introducing as part of its efforts to increase production capacity. Currently, 30% of Aqualectra's average annual production comes from wind energy. This is even much more than countries, including the Netherlands.

At the Koraal Tabak site on the east coast of Curaçao, the official start was given for the construction of a fourth Aspiravi group wind farm on the island. Aqualectra and NuCapital Aspiravi are jointly building five
