

# DR Congo ventient energy

How much energy does DR Congo have?

The national hydroelectric potential is estimated at about 100,000MW, corresponding to 13% of the global potential or 66% of Central Africa's potential. In 2014, the country's energy supply represented only 2% of the hydroelectric potential. Consequently, the DR Congo has been exposed to a chronic energy deficit. 2.1.

What did DR Congo do in 2014?

In 2014, the DR Congo reformed the energy sector's legislation with the World Bank's assistance. The energy sector's liberalization aimed to provide affordable and reliable energy to all consumers. 3.1. Key priorities in terms of energy security On June 17, 2014, the electricity law n°176/14/011 was promulgated [15].

Is the Democratic Republic of the Congo an energy exporter?

One of the Inga dams, a major source of hydroelectricity in the Democratic Republic of the Congo. The Democratic Republic of the Congo was a net energy exporter in 2008. Most energy was consumed domestically in 2008. According to the IEA statistics the energy export was in 2008 small and less than from the Republic of Congo.

What is the potential of the DRC to generate energy?

The DRC's potential to generate energy is high, having a wide range of both renewable and non-renewable energy sources. The DRC's potential renewable sources are hydropower, biomass, solar, wind and geothermal, while the non-renewables would be oil, natural gas & uranium.

How does the Democratic Republic of the Congo support the economy?

In the AC, Democratic Republic of the Congo supports an economy six-times larger than today's with only 35% more energy by diversifying its energy mix away from one that is 95% dependent on bioenergy.

Is DR Congo facing a serious energy crisis?

The DR Congo has faced a severe energy crisis despite major energy potential. In 2014, it liberalized its energy sector. The paper examines the Inga 3 dam project, which is confronted with political, geostrategic, and financial challenges.

Ventient Energy is a pan-European renewable energy business and one of the leading independent generators of renewable energy in Europe with 2.8 GW of installed onshore wind capacity and integrated energy market solutions across 145 sites.
