

That's where we are seeing a shift in distribution models that have traditionally been based on a centralised system managed by the government. With generation projects in full swing, private ...

Speaking at Enlit Africa 2025, Onyango outlined how Kenya's experience with PPPs has evolved from generation projects to increasingly include distributed energy solutions. "Kenya Power ...

In this regard, this paper proposes a distributed fast voltage regulation method for energy storage systems (ESSs) in distribution networks. Firstly, to reduce the communication burden, the ...

Detailed info and reviews on 44 top Logistics/Supply Chain companies and startups in Kenya in 2025. Get the latest updates on their products, jobs, funding, investors, founders and more.

The Brussels conference was a critical juncture in global energy policy, coming after the historic COP28 agreement, where nearly 200 countries pledged to double the global rate of energy ...

Kenya Power has announced scheduled electricity interruptions across several parts of the country on Wednesday, July 23, 2025. The planned outages are expected to last from 8:00 a.m. to 5:00 p.m. in most areas, as part of ongoing ...

The Solarthon Energy Bean 250W isn't just a power bank; it's a complete mobile energy storage system built for convenience, safety, and efficiency. All-In-One Convenience: This is a truly multi-functional device, integrating a 250W AC ...

At a time when the region's energy needs are exploding amid pressures from climate change mitigation straitjackets, both countries have the opportunity to take the bold action of pursuing nuclear power projects together with active ...

Transformers are essential components of the electricity ecosystem. They convert high-voltage electricity generated at power stations to lower voltages suitable for safe delivery to homes ...

In the interconnection and optimized operation of the classical hybrid AC/DC microgrids (HMG), the conventional line-frequency transformer cannot block grid faults and comprehensively ...

The Distributed Energy Buyback Scheme (DEBS) offers eligible customers a payment for electricity they export to the grid, including from rooftop solar PV systems, batteries and electric vehicles. The DEBS pricing structure ...
