

# Dominica skywatt energies

Does Dominica have a national energy plan?

Dominica drafted a national energy plan in 2011 and revised it in 2014. The objective of the plan is to make electricity generation on the island self-sufficient by 2020 using sustainable and indigenous resources.

Does Dominica generate solar power?

Dominica has a high solar potential with a solar resource of 5.6 kWh per square meter per day. The government has installed LED streetlights (in 2013 and 2014). Dominica also has approximately 30 MW of wind power potential, some of which is under development.

Can Dominica develop geothermal power?

Dominica is expected to develop more than 100 MW of geothermal power and has secured funding for early-stage investment through the World Bank's Geothermal Development Plan. The island may be able to secure additional international and private sector funding for these projects.

How much wind power is available in Dominica?

Dominica has a wind power potential of 10 MW at Crompton Point in Saint Andrew and an additional 20 MW elsewhere in the country. After reviewing nine wind studies, DOMLEC came to this conclusion.

What is the cost of electricity in Dominica?

The electricity rates in Dominica, as of 2015, were \$0.39 per kilowatt-hour (kWh). This is higher than the Caribbean regional average of \$0.33/kWh.

Will Dominica reduce its reliance on fossil fuels?

Roseau, Sept. 25, 2023 (GLOBE NEWSWIRE) -- The Commonwealth of Dominica, a Caribbean Island nation, has been taking substantial steps to revolutionise its energy sector and diminish its reliance on imported fossil fuels.
