With the anticipated improvements in technology and increased supply of panels from China/Europe, the capital costs are expected to stabilize at lower levels. As a result, investors ...

Make sure your roof can support solar panels. A solar installer, roofing expert, or structural engineer can help you determine your roof's solar suitability. It can help to know when your roof was installed or replaced, but if you don't know and can't ask the previous homeowners, your local government should have a record of when it ...

In December 2020, the "El Aromo" solar energy project was approved in coastal Manabí province, Ecuador. Operated by the Spanish company Solarpack, the project is expected to transform national solar output. El Aromo will occupy 2.9km² of land that was previously cleared to build a multi-billion dollar oil refinery, plans that have since been abandoned.

Solar Roof is comprised of both glass solar tiles and steel roofing tiles. Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection.
