

Energport battery Saint Martin

What is Energport Energy Storage?

Energport's energy storage systems provide a fully integrated, turnkey energy storage solution using lithium iron phosphate batteries. These batteries, utilized in hundreds of thousands of electric vehicles, offer unparalleled degrees of safety and reliability within the Energport line of outdoor commercial & industrial and utility scale energy storage systems.

What is the Energport battery?

Energport, Inc., founded in 2016, is a Silicon Valley based supplier of integrated energy storage systems using lithium-iron phosphate battery cells. Lithium-iron phosphate is the safest lithium-ion battery chemistry on the market and is the optimal chemistry for stationary storage.

What makes energport energy efficient?

Energport - We make energy efficient! We Make Energy Efficient! Scalable energy storage solutions for any project. Fully integrated, pre-configured and packaged systems reduce footprint, onsite installation time and cost, increase quality and reliability. Scalable from Residential to Utility.

What can Energport offer for me?

Energport offers energy storage systems that range from residential to large-scale, containerized systems for businesses and utilities. As a strategic partner with one of the world's largest lithium-ion battery manufacturers, Energport can deliver high quality energy storage systems to meet your needs.

What is an Energport system?

Energport systems are multi-MWh solutions that are actively cooled and can operate in a wide range of temperature conditions. Energport serves the utility and developer market with these systems, available in 40' container or skid-based designs.

The unnamed power producer, which signed a contract with PJM, will own the battery system. It will be installed in two locations where the company also owns wind power plants, said Ben Williams, director of product and market development for Energport, which provided the battery and associated hardware and software.

Energport announced it has begun installation of a 72MW/72MWH battery energy storage system for a major global independent power producer. The system, which will be divided across two sites, will complement existing onsite renewable energy generation and will provide fast responding frequency regulation service in the PJM market. ...
