The stability and affordability of power from the new Ta'u microgrid, operated by American Samoa Power Authority, provides energy independence for the nearly 600 residents of Ta'u. The battery system also allows the island to use stored solar energy at night, meaning renewable energy is available for use around the clock.

The key components of smart home energy. Smart energy systems are being led by demand, met by supply that may well be increasingly variable as nations become increasingly reliant on renewables. For this reason, a basic device like the smart meter is becoming pivotal to navigate levels of supply and demand and help users to make better ...
