

# Energy solar Venezuela

Can solar energy be used in isolated rural communities in Venezuela?

It aims to develop the use of renewables within isolated rural communities includes solar. The future development of the solar energy sector in Venezuela with the growth of energy consumption and substitution of fossil fuels by renewable energy potential is likely to promote the solar energy market in Venezuela.

What type of energy does Venezuela use?

Venezuela relies heavily on domestic production of fossil fuels, with oil and natural gas comprising approximately 90% of the country's total energy supply. Hydro power also plays a key role in electricity generation, accounting for roughly half of installed capacity.

How much solar power does Venezuela have?

According to the latest statistics published by the International Renewable Energy Agency, Venezuela had around 5.32 MW of installed solar PV power generation capacity in 2019. In 2019, the Venezuelan government announced a plan to build its first utility-scale PV project to strengthen its National Electric System.

Why is solar energy becoming more popular in Venezuela?

Solar energy is one of the fastest-growing forms of energy in power generation that is expected to show a gradual increase in the energy mix of Venezuela. This tendency is maintained by the significant decrease in the cost of renewables with the support of investments and new technologies.

What is the role of coal in Venezuela's energy mix?

In comparison to oil and natural gas, coal plays a minor role in Venezuela's energy mix, accounting for 0.2% of total energy production and 0.1% of total energy consumption. Venezuela's coal industry has faced challenges such as outdated infrastructure and limited investment, which has affected production.

How is natural gas used in Venezuela?

Venezuela's natural gas reserves are still underutilized, and a large portion of the country's current natural gas output is used to supplement the output of mature oil fields rather than sold to generate revenue.<sup>24</sup> A portion of this natural gas (about 30%) is reinjected into oil fields to increase crude oil production.

Ideally tilt fixed solar panels 11°; South in El Pilar, Venezuela. To maximize your solar PV system's energy output in El Pilar, Venezuela (Lat/Long 10.9869, -63.8314) throughout the year, you should tilt your panels at an angle of 11°; South for fixed panel installations.

Solar Energy: Venezuela has abundant sunlight throughout the year, making solar energy a promising renewable energy source. Promoting solar photovoltaic installations, especially in ...
