Marine Energy Solutions provides physical supply of marine fuels to vessels calling Estonian ports. The company was founded in March of 2016 and has been actively engaging in sales since February 2017. Although relatively new on the market, the people behind it are well-known to the shipping and bunkering industry.

Estonia may not be sitting on massive oil deposits, but it does have plenty of wind, water, and, occasionally, sun. That may be enough to turn this country of islands, bogs, and ingenuity into a hydrogen energy powerhouse, if its talents can put their heads together and work prodigiously. The country's hydrogen energy sector is inarguably young.

Energy in Estonia has heavily depended on fossil fuels. [1] Finland and Estonia are two of the last countries in the world still burning peat. [2] [3]Estonia has set a target of 100% of electricity production from renewable sources by 2030 [4] and climate neutrality by 2050. [5]In response to geopolitical tensions, Estonia reduced its reliance on Russian energy sources by halting ...

PowerUp's ambition to redefine energy solutions has led them to explore partnerships beyond Estonia's borders. They are currently engaged in a similar project with Tele2, another major telecommunications company. The success of their pilots has laid the foundation for discussions on a wider overhaul of backup power solutions at cell towers ...
