

The National Energy Regulator of South Africa (NERSA) is a regulatory authority established as a juristic person in terms of Section 3 of the National Energy Regulator Act, 2004 (Act No. 40 of 2004). NERSA's mandate ...

The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...

Thermal energy storage isn't just a technical fix--it's a strategic enabler for clean energy, resilient societies, and sustainable economic growth. Its proven ability to integrate...

Comprehensive analysis proving how solar-powered home batteries can reduce electricity bills by 30-50% in 5 years through peak shaving, TOU arbitrage, and VPP participation. Includes real ...

Experts attending the session of Potential of Small Modular and Micro Reactors in Accelerating Africa's Energy Transition examined the Africa's current infrastructure landscape, pinpointing ...

Asia-Pacific and the Middle East and Africa will retain a large share of thermal generation in their power mix, while South and Central America will continue to have the cleanest power mix.

The study also evaluates the long-term economic viability of TES, considering installation costs, energy savings, and payback periods under varying tariffs. This research ...

The significant progress reported by the West and Eastern Africa power pools augurs well for the increased international trading that is increasingly seen as essential to draw in deeper investment in the continent's electricity ...

India Renewable Energy: India's renewable energy installations surged by 56% in H1 2025, surpassing fossil fuel capacity and moving closer to its 2030 clean energy goals. Discover the challenges and future of India's energy transition.

Uganda joins a growing list of African nations turning to biofuels to speed up their energy transition. While the shift brings economic opportunity, it also raises red flags over food security.

In response to Africa's unique energy challenges--namely an underdeveloped power grid alongside abundant solar resources--Anern showcased its innovative " Solar + Storage ...

Energy storage economics central africa

Construction at the Red Sands battery energy storage system (Bess) plant in South Africa's Northern Cape is imminent following financial close on 1 July. Once completed, the project developers said the plant will be one of ...

Power, Strategy & risk Issue 519 - 21 January 2025 PowerGen raises funds for renewable energy and battery storage projects DR Congo, Sierra Leone, Nigeria Power Issue 518 - 11 December 2024 CrossBoundary Energy ...

Africa's largest standalone battery energy storage system (BESS) project, the 153 MW/ 612 MWh Red Sands project in the Northern Cape, has reached financial close, having raised some ...
