

Finland's groundbreaking sand battery stores excess renewable electricity as heat, offering a long-lasting, low-cost, and carbon-neutral solution for meeting winter heating demands in cold ...

The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...

The Arctic's harsh climate and inadequate infrastructure make it difficult to produce food reliably. The high cost of imported foods and energy, economic fragility, and lack of food storage and ...

Heating, ventilation, and air-conditioning (HVAC) systems account for the largest share of energy consumption in European Union (EU) buildings, representing approximately 40% of the final ...

As the largest independent energy storage facility in southern Xinjiang, this project is expected to provide significant momentum for regional energy transition and economic development. ...

NTR, a prominent renewable energy specialist known for its innovative approaches to sustainable technology, has selected Fluence Energy, Inc. to develop a flagship Battery ...

Google enters long-duration energy storage (LDES) with a global commercial partnership and investment in Energy Dome. Energy Dome's CO₂ Battery stores clean energy for 8-24 hours, ...

Wärtilä Corporation, Press release, 8 July 2025 at 3PM EEST Technology group Wärtilä will supply a 204 MW power plant solution for the Reko Diq copper-gold mining project in ...

It paves the way for the joint development of battery storage and renewable energy facilities aimed at enhancing the state's energy resilience and aligning with national sustainability goals.

Detailed info and reviews on 44 top Energy & Cleantech companies and startups in Finland in 2025. Get the latest updates on their products, jobs, funding, investors, founders and more.

Our solutions include flexible engine power plants, energy storage and optimisation technology, and services for the whole lifecycle of our installations. Our engines are future-proof and can ...

By the end of the decade, there could be 20 million new jobs across the various energy sectors but in North America, filling these new roles will be a challenge. On Demand Expert Session: Battery Storage Economics

and ...

As the energy landscape transforms, so does the complexity behind every battery, truck and megawatt-hour. Matthieu Stephant is the one making sense of it all, bringing both analytical rigour and creative energy to the task of ...

LG Energy Solution reported a rise in its second-quarter profits despite a forecasted slowdown in electric vehicle (EV) demand expected by the first half of 2026. The company has indicated ...

Underground "lake" helps cool Helsinki as demand for district cooling rises Finland is in the midst of a record-breaking heat wave and Helsinki's subterranean reservoir helps cool off over 500 ...

Helsinki's underground cooling system stores millions of litres of cold water to fight heatwaves. A massive reservoir beneath Esplanade Park helps supply chilled energy to homes and ...
